

# Grade Posting and Feedback Visibility

*Understand the difference between entering, hiding, and posting grades.*

FTCC Canvas Faculty Resource | New Quizzes only | Panopto and Class Collaborate supported | No Canvas Studio

## Click Path

**Grades → Assignment options → Grade Posting Policy**

## Purpose

Entering a score does not always release the score, rubric, annotations, or comments. Posting policies determine when students can see grading results.

## Steps

1. Review the course-level posting policy.
2. Check whether the individual assignment overrides the course policy.
3. Use manual posting when grades should be released together after grading is complete.
4. Grade and comment in SpeedGrader.
5. Use Post Grades and select the intended students or section.
6. Confirm hidden indicators are removed as intended.
7. Check the student Grades view and feedback locations.

## Verify

- |                                                                       |                                                                |
|-----------------------------------------------------------------------|----------------------------------------------------------------|
| <input type="checkbox"/> Policy matches the grading plan.             | <input type="checkbox"/> No grades were released early.        |
| <input type="checkbox"/> Intended grades are posted.                  | <input type="checkbox"/> Rubric and comments are visible.      |
| <input type="checkbox"/> Section-specific posting was used correctly. | <input type="checkbox"/> Students know where to find feedback. |

## Watch For

- Hiding a previously posted grade is not the same as setting a manual policy before grading.
- Students may receive notifications based on their settings.
- Mobile and web views can display feedback differently; verify important feedback.
