

What Students See After You Grade

Verify scores, comments, rubrics, annotations, and quiz feedback from the student side.

FTCC Canvas Faculty Resource | New Quizzes only | Panopto and Class Collaborate supported | No Canvas Studio

Student Grades → Activity details / Submission details

Purpose

Feedback is useful only when students can find and understand it. Canvas displays different feedback types in different places.

Steps

1. Identify which feedback was provided: score, submission comment, rubric, annotation, file, discussion comment, or New Quiz feedback.
2. Confirm the grade and feedback are posted.
3. Open the student Grades view and select the activity.
4. Check submission details, rubric details, annotations, and comments.
5. For New Quizzes, review result-view settings and feedback timing.
6. Tell students where to find the feedback when the location is not obvious.

Verify

- | | |
|--|---|
| ☐ Score is visible when intended. | ☐ Submission comments appear. |
| ☐ Rubric ratings and comments appear. | ☐ Annotations are accessible. |
| ☐ New Quiz feedback matches settings. | ☐ Student knows the next action. |

Watch For

- Manual posting can hide feedback until grades are posted.
- Students may overlook document annotations or rubric details.
- Do not assume an instructor-visible comment is automatically student-visible.
